Alternator Swing Bracket Part Number BKT5557FT

Fits 95 Amp Ford 3 G Alternators when mounting to 1955-1957 T Birds.
Use with 1/2" alternator pulley.

When replacing your generator with our alternator kit you will bolt the large U of the swing bracket to your original generator bracket, then mount the alternator to the small U with hardware provided.

Most applications you can reuse the original belt tension rod. You may have to grind some material off or you may have to flip the bracket to clear the fan.

***Typical 1955-1957
T Bird Kit***

Note: Use proper tightening procedures for all mounting hardware.

Be careful working around rotating engine parts, loose clothing and fingers can get caught and cause injury.
