Adapts 1955-1962 Ford Thunderbird generator engine mount to alternator  
Does not fit standard Y-block applications other than Ford Thunderbird:  
install BKT5464Y for all other applications

The small “U” fits standard Ford 3G series alternators with 3 inch mounting boss.

The long portion of the adapter bracket fits onto the existing generator engine mount. Mount the new bracket to the engine mount using the same hardware that held the old generator to the engine mount, then tighten the two bolts.

Install the 2 bolts and nuts provided to fasten the small U to the long U. Don’t tighten these fasteners until the alternator is mounted and pulleys are aligned. Once aligned tighten. Install the alternator with the hardware provided. No need to over tighten the alternator; the bolt should have some movement. Install the existing belt tension arm onto the alternator and adjust the belt tension. The belt should be tight enough that it does not slip. In some cases, the tension arm may need to be modified to fit and is not included.

#### Bracket Includes:

BOLT 3/8-16 x 1	2
BOLT 7/16-14 x 4	1
NUT 3/8-16 NYLOCK	2
NUT 7/16-14 NYLOCK	1
USS FLAT WASHER 7/16"	1
