Fits: Standard Autolite generator engine mount to alternator  
Small "U" fits standard GM Delco style 10Si and CS series alternators

The long portion of the adapter bracket is made to fit onto the existing Autolite generator engine mount. Mount the new bracket to the engine mount using the same hardware that held the old generator to the engine mount.

Install the alternator using the hardware provided. There is no need to overtighten the alternator bolt; the alternator should have some movement.

Install the existing generator belt tension arm onto the alternator and adjust the belt tension. We do not provide this tension arm as there were several types depending on the year of the engine. The belt should be tight enough that it does not slip. In some cases, the tension arm may need to be modified or flipped around to fit.

### Bracket Includes:

- |                         |   |
|-------------------------|---|
| BOLT 5/16-18 x 1        | 1 |
| BOLT M8 x 1.25 x 25mm   | 1 |
| BOLT 3/8-16 x 3         | 1 |
| NUT 3/8-16 NYLOCK       | 1 |
| USS FLAT WASHER 1/4"    | 1 |
| USS FLAT WASHER 5/16"   | 1 |
| SPLIT LOCK WASHER 5/16" | 1 |
