Adjustable bracket fits both Delco long-case and short-case generator engine mount

The small "U" fits standard Delco 10Si and CS series alternators

The long portion of the adapter bracket is made to adjust for either the long or short case engine mount. Mount the new bracket to the engine mount using the same hardware that held the old generator, then tighten the two bolts. The bracket is slotted to allow for adjustment and proper fit to the engine mount. Tighten the two bolts that hold the two parts together using the hardware provided.

Install the alternator using the hard ware provided. There is no need to overtighten the alternator bolt; you want the alternator to have some movement. Install the existing belt tension arm to the alternator and adjust the belt tension tight enough that the belt will not slip.

### Bracket Includes:

- |                       |   |
|-----------------------|---|
| BOLT 5/16-18 x 1      | 1 |
| BOLT M8 x 1.25 x 25mm | 1 |
| BOLT 3/8-16 x 1       | 2 |
| BOLT 3/8-16 x 3       | 1 |
| NUT 3/8-16 NYLOCK     | 3 |
| USS FLAT WASHER 5/16" | 1 |
